

70 Programmable Preset Time Saver!

This versatile press allows you to swap out platens depending on the cap size and where you are pressing within on the cap. Offering a unique hold-down system your headwear will stay in place and you will get consistent presses on every project.

Interchangeable Platen Super Star!

With a wide range of interchangeable platen sizes, the AutoCap press gives you the ability to press various types of hats including low profile, unstructured, and different sized crowns. This gives you the ability to offer your customer a wide range of caps and hats.

All-in-one Hat Press Workhorse!

Our flexible 360 press gives you the ability to press hats in multiple locations without need any extra platens or accessories. Just like the name suggests, you'll have the ability with this press to print on all sides! You'll get consistent high-quality results with a heated top and bottom platen.

NEW!

The Transportable Go-Getter!

The HIX B-250 is a portable hat press that's light-weight for easy transportation and durable enough for repeated use. It is great for crafters and customization professionals who travel to events for on-site personalization. This press comes standard with three separate cap platens: a golf size, a ball size, and a youth size.
