Icons

LOOK FOR THESE KEY ICONS THROUGHOUT THE CATALOG DISPLAYING FEATURES OF SPECIFIC MATERIALS:

LASERABLE (LASER ENGRAVING)

Acrylic core materials with thin cap surfaces that can be easily engraved with minimal wattage at increased speeds. ABS materials are not recommended for lasering applications.

ROTARY ENGRAVABLE/ ROTATING CARBIDE ENGRAVING

This process is suitable for most commercial and industrial work. Unlike diamond-drag, rotary engraving is the only means of engraving plastic materials with controlled depth.

FRONT ENGRAVABLE

The cap layer is engraved or lasered through to expose the core layer, thus providing a color contrast between cap and core.

UV-LED PRINTABLE

Acrylic sheet materials developed to be print receptive with most UV-LED printing inks and light sources.

HEAT TRANSFER

Substrate that accepts toner from heat transfer sheets.
