

Baltic Birch Cake Topper

INSTRUCTIONS

Here we have a cool little wood piece that says lets party in a unique way!

We used 1/8" Baltic Birch for this little fella!

1. Import your design and adjust power and speed settings.
2. Mask both sides so the laser doesn't char it when cutting.
3. Insert material into the laser bed. Use the focus tool to adjust to the top of the material. Focusing should be done each time a new material is introduced.
4. Run the job file.
5. Carefully remove the piece from the board, give it a good cleaning.

A perfect way to stylishly say happy birthday!
