

Single Ply Acrylic Bookmarks

INSTRUCTIONS

A project is out of this world, that helps keep your place in your current read!

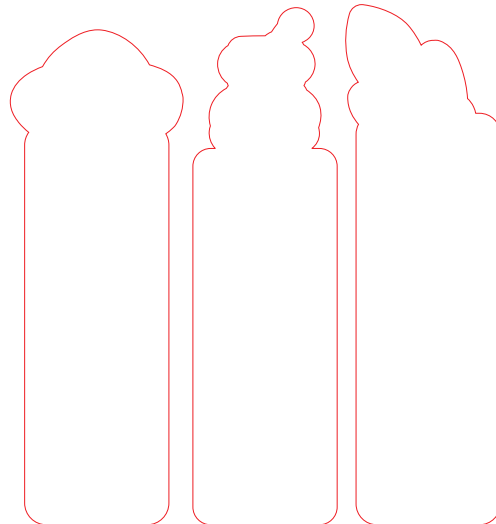

We used 1/8" Black & 1/32" Bright White ADA Alternative Sheet, but you could pick any color that suits your fancy!

1. Import your design and adjust power and speed settings.
2. Place your black sheet into your laser bed. Use the focus tool to adjust to the top of the material. Focusing should be done each time a new material is introduced.
3. Run the cut file job
4. Apply adhesive to the back of your white sheet. Place sheet into your laser bed.
5. Run second cut file.
6. Weed away unwanted material and adhere your characters to your black backer.

A perfect way to put a pin in your reading!
