

ColorShop Woods™ Perpetual Calendar

INSTRUCTIONS

Here we have a cool little project that will add a little style to your desk and keep things spinning on track!

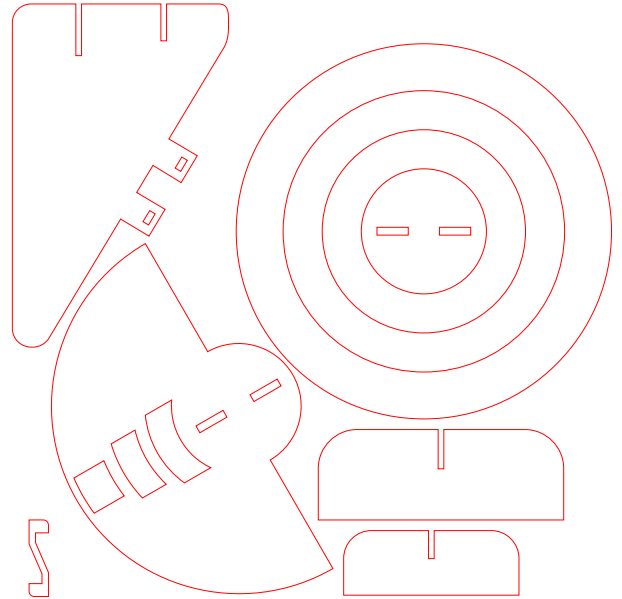

We used 1/8" ColorShop Woods™ Cardinal Red. This is real wood, AND you can cut and engrave it!

1. Import your design and adjust power and speed settings.
2. Mask the side of your material you will be cutting so the laser doesn't char it when cutting.
3. Insert material into the laser bed. Use the focus tool to adjust to the top of the material. Focusing should be done each with a new material.
4. Run the cut job file.
5. Remove the mask, and everything that doesn't need engraved, then center the remaining pieces in the bed.
6. Using the capture feature, take a snap shot of the bed and overlay your engrave files and Go baby go! Easy peasy, slapa kneesie!
7. Grab the engraved pieces from the bed, clean it all up and there ya have it.

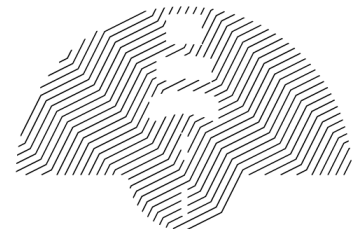

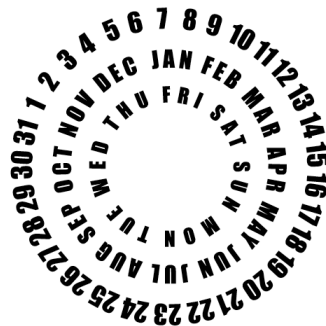

A cooky little calendar that will keep your days straight and your months spinning!
