

Saddle
Collection™

Pennant Banner

INSTRUCTIONS

A happy project to quickly add fun art to a bare wall in your home!

We used our 18" x 24" Buckskin from our Saddle Collection. This material LOOKS and FEELS like real leather.

1. Import your design and adjust power and speed settings.
2. Insert material into the laser bed. Use the focus tool to adjust to the top of the material. Focusing should be done each with a new material.
3. Tape the full piece in place so it doesn't move.
5. Run your engraving job first to prevent your project from warping.
6. Use the capture feature to cut your pennant corner holes, as well as the full shape out.
7. Take some leather cord, and tie it to the corner holes, creating a loop to hang from the wall.

Voila! Simple wall décor that packs a punch and sends some cheer to all who see it.
