

# Lucent Stencils

## INSTRUCTIONS

**This quick project allows you to make brew-tiful patterns on coffee, cakes and more!**

*We used our .025" Translucent Blue from our Lucent collection to create this little diddy.*

1. Import your design and adjust power and speed settings.
2. Insert material into the laser bed. Use the focus tool to adjust to the top of the material. Focusing should be done each with a new material.
3. Tape the full piece in place so it doesn't move.
4. Run job file.
5. Take your cut pieces out and give them a once over with a soft bristle brush to clean the debris.

***Now you have a fun way to spice up your life! Enjoy!***
