CASE STUDY: AGIO IMAGING HELPS ATHLETES WITH MOTIVATIONAL DIBOND® SIGNAGE

Vicksburg High School parent and account executive Marc Androsky with Agio Imaging, a large-format custom print solution provider, approached school leaders about “sprucing up” the training facility with bulldog mascot-inspired signage highlighted in Vicksburg’s red-and-white school colors, according to Davina Logan, director of sales, marketing and administration, Agio Imaging.

“The idea was to transform the plain white space with the school’s colors and branding,” said Logan. “Marc wanted it to be a motivational, fun place to be. Even though students may be hurt when they enter the training room, we wanted to inspire them and to promote school spirit.”

Agio Imaging chose 3mm white Dibond® – supplied by the Grand Rapids, Mich., branch of distributor Laird Plastics – for direct printing display graphics with a super-wide format UV printer. A CNC router was used to contour the signs to various sizes and shapes, including one circular sign and one arched sign with lettering.

The five signs created for the training facility ranged in size from 47.5 inches by 47.5 inches to 95 inches by 47 inches. Graphics were designed to recognize all Vicksburg High School athletic teams and to promote school spirit, including a large circular sign featuring a bulldog mascot caricature. “Vicksburg” lettering tops an arched sign describing the VHS Training Facility as the space “where Bulldogs mend their paws” and punctuated with a paw print.

“We chose Dibond® for its rigidity and extreme durability in creating these large signs,” said Logan. “It routes exceptionally well with clean, sleek edges and allows us to cut out custom shapes.”

Agio Imaging used stainless steel standoffs to install the signs on the walls of the Vicksburg High School Training Facility in October 2015.

“The school loved these signs,” said Logan. “It was a complete transformation of the training room for them.”
